World today is in a big chaos. Sometimes, it appears as though it is beyond repair. But, there is no need to despair.

**SOCIALIST ECONOMICS ~a Cinderella \*\***

There are zillions of Universities and Colleges adsolz in the world which teach Capitalist Economics . Even the so-called self-declared Socialist and Communist countries also do not have Schools of Socialist Economics . It is one of the dreams of this ybrao-a-donkey that he should someday write a book on Socialist Economics .

This book on Socialist Economics which I dream of should not only cover pre-installation problems of a Socialist Society but also the problems of Post-installation problems of Socialism. This is because Socialist goals are Idealistic and Utopian. Any kind of Socialist without removal of Private Property Dominated Rights is to be treated as useless and is not worth campaigning for . Dictatorial countries should not be confused with Communist and Socialist countries, though the Governments ruling there may proclaim that they are Socialist and Communist .

★SOCIALIST ECONOMICS : 15 ★SOCIALIST ECONOMICS :

swer which is given is Russian Economy depends upon export of a single commodity i.e. Oil, and booms and busts in International Oil Markets affect Russia . Excessive dependence on one commodity- with depressed Oil prices , sanctions imposed by U.S.A. and European Union, Corona Virus may be exacerbating their problems . But they may not be the root causes. Growth Rates in Russia cannot be viewed from the point of view of consumer behaviors or Market dynamics. Reason: Russia is a country of vast geographical resources, and low population density. That means , they have few mouths to feed . Therefore , there should be

substantial domestic surpluses with few demand pulls .

Russia 's GDP as at 2021 is estimated at US\$ 1.25 Trillion . It may not be too high when compared to its geographical expanse and mineral wealth . Russian Economy is a Mixed Economy . Though theoretically Mixed Economies are expected to imbibe their strengths both from Private Sector and Public Sector , it rarely happens. On the other hand Private Sector thrives by devoring on Public Sector .

1 Mr. Donald Trump may be an unfit and incompetent President. But, it does not appear to be reasonable for Mr. Biden to say that . It is too early for Mr. Biden to say that . There will be others to say that . Mr. Biden should also ensure that his main followers shall not say that . Reason: Mr. Biden may also someday lose an election and may become a former President . Then his Successor or Republicans may

Question : To what extent Covid 19 is responsible for the Low Rate of Growth in EU Member countries ?

Ans: Even before outbreak of Covid 19, some EU members have very low rates of growth . Those countries have their own sets of Structural Disequilibria and BOT and BOP rigidities. Covid 19 might have added to the chaos and the crises. What EU seems to have achieved seems to be an Artificial Union resulting in slavery of Debtor Nations to Creditor Nations. Weak and Debtor EU Nations can regain their lost prestige and freedom only if they promote their exports to countries outside the EU Framework.

### A MODEL OF GLOBE

Both Freedom of expression is under stress and threat both in Democratic countries and in Dictatorial countries alike.

E.g.: Julian Assange in USA, UK and Sweden. Alibaba founder Jack Ma in China and Hongkong.

CHINA'S THIRST TO CAPTURE NEW TERRITORIES AND NEW SHORES, AND SHORE ISLANDS  
China seems to be in a belligerent mood . Its President has seized more dictatorial powers from a

Collective Council presided by its Prime Minister .

## WORLD'S POLICEMAN USA

The President of the World's Policeman is unwilling to step down after losing Election.

7 rsnz/: reasons , Reasons:

This is not a hypothetical question. After the exit of UK from EU , others are watching for the result from UK. If UK successfully revives its economy, and solves its problems of Unemployment, others may follow UK. EU furnace or not going to cool down in near future .

**GERMANY ~ Europe's Richest country \*\***

Germany is Europe's Richest Country. Also Europe's most populous country . In spite of Covid 19, it is reported to be growing @ 4.4% p.a. Germany's main strength is its "Medium Industry". Unemployment rate is just 3%. World's third largest Exporter and Importer . Leaving aside German beers, breads, cars, festivals, football, Germany seems to face accusations and allegations of "hegemony", which probably refer to its bringing pressures on debtor EU members.

He is reported to have  
said that :

has always adhered to  
the principle that all  
countries, large or  
small, are equal. China-  
Seychelles relations are  
a model in this regard.  
..."

"...China has always ad-  
vocated multilateral-  
ism, opposed power  
politics, promoted de-  
mocratization in inter-  
national relations, and  
supported the United  
Nations to play its due

fairs..."

" \_\_\_\_\_ Big countries  
should take the lead in  
abiding by the basic  
norms of international  
relations, not interfer-

ing in other countries'

Strain of Corona \*\*

Covid: England's third  
national lockdown  
legally comes into  
force.

Mr. Boris Johnson was  
reported to have said :  
I have 'no choice' but  
to impose the new lock-  
down, with the number  
of patients in hospitals  
40% higher than in the  
first peak.

ybdnky: I feel that there  
is no need to panic for  
Great Britain . In a Cost-  
benefit analysis, the  
costs of lock down  
seem to overwhelm its  
benefits. Reason: Lock-  
downs do not wake up  
human intellects. Police  
treat citizens as sheep.  
leaving aside the vacci-  
nation mode of preven-

tion of Corona, which needs massive expensive campaigns, we have to assume that Winters are creating conducive climate for proliferation of Corona. When hospitals get overcrowded , they themselves become Spreaders of Corona. What the Investigation Teams have to inquire into is what natural foods, what natural herbs will help the body needs to drive out the virus or to make it (the virus) a dud. That means, the venue of making the needed medical concoctions and tablets should shift to "homes" from Pharma companies which make chemical stuffs, the gravity of usage of which even the medical Doctors do not know

fully . Then , staying at home , working from home , get their synergy from home cures. This apart, allied wasteful social expenses on wining , dining, shopping will also come down .

etc.

★CONGO- DEMOCRATIC  
REPUBLIC :

**CONGO- DEMOC-  
RATIC REPUBLIC**  
~ poorest coun-  
try in Africa \*\*

<https://www.gf-mag.com/global-data/economic-data/the-poorest-countries-in-the-world> :

Congo is the poorest country in Africa . Per capita income: \$785. Other poor countries in Africa are Burundi, Liberia, Niger, Malawi, Mozambique, Eritrea, and South Sudan. Central African Republic is a wealthy country with poor people . It is the hungriest. Internal civil wars and ethnic /sectarian conflicts are ubiquitous . It has almonds,

diamonds, gold , Oil, Uranium reserves . Poverty is like a Punishment for a crime which was never committed by a person .
